

OFFSHORE & SUBSEA SOLUTIONS · 100% MADE IN THE USA

Protecting Offshore Assets and Subsea Structures

Houston Anodes has protected deepwater platforms, subsea pipelines, and offshore wind foundations worldwide since 1977. Our electromagnetic induction anodes last 40% longer than gas-furnace alternatives.

OFFSHORE PRODUCTS

Anode Types for Offshore & Subsea

- Platform Anodes**
90°/45°/straight core configurations. Types A & B for welded jacket applications. 180–1,250 lbs structural protection.
- Bracelet Anodes**
10"–30" diameters. Square/tapered, weld-on/bolt-on. 22–265 lbs per unit, retrofit-ready.
- Offshore Wind**
Turbine foundations, monopiles, transition pieces. Delivered for Ocean Wind 1 & Revolution Wind.
- Custom Subsea**
Any geometry manufactured to exact specifications. From 5 lbs to custom configurations.

WHY HOUSTON ANODES

Our Advantage

- Electromagnetic induction technology** — 100% homogeneous alloys, zero contamination, zero porosity, perfect density
- 50% faster processing** than conventional gas furnaces
- 40% longer anode lifespan** — gas-furnace anodes waste up to 41% of material as passive/inert portions
- In-house ISO 17025 lab** — Bruker Q8 spectrometer, chemical analysis on every heat, NACE TM-0190 on every batch
- Highest purity raw materials** — Al 99.9%, Zn 99.99%, In 100%. Never melt scrap or recycled anodic material
- All manufacturing in Houston, TX** — 2–4 week lead times vs. 4–8 months from imports

SUCCESS STORIES

Trusted by Industry Leaders

Currently protecting major offshore assets and subsea structures worldwide for ExxonMobil, Shell, BP, Chevron, PEMEX, TechnipFMC, Subsea 7, J. Ray McDermott, Hess, Anadarko, Oceaneering, Sapura Energy, Ørsted, Deepwater, Noble, and the United States Navy.

Standards & Compliance

- ISO 9001:2015 — Quality Management (DNV)
- ISO 17025 — Accredited Laboratory
- NACE SP-0387 & SP-0492 — Sacrificial Anode Standards
- DNV RP B401 — Cathodic Protection Design
- ISO 15589-2:2012 — Petroleum & Gas CP
- NORSOK M-503 — Norwegian Petroleum CP
- NACE TM-0190 — Electrochemical Testing (every batch)
