## ONSHORE PRODUCTS

### Anode Types for Onshore Applications

**Pier, Piling & Ballast**

Trapezoidal flush core, stand-off (A & B), rod core, rod stand-off. Ballast protection systems.

**Tank & Vessel Anodes**

Heater treater, heater treater eyebolt, bowling ball, drum. Internal vessel protection.

**Pipeline Bracelets**

10"–30" diameters. Square/tapered, weld-on/bolt-on. 22–265 lbs, retrofit-ready.

**Custom Anodes**

Clamp, mat, link. Any geometry for refinery, chemical, or infrastructure applications.

Light: 5–99 lbs

Medium: 100–400 lbs

Heavy: 401–1,650 lbs

Custom

## WHY HOUSTON ANODES

### Our Advantage for Onshore

- **Electromagnetic induction** — 100% homogeneous alloys, zero porosity, perfect density. 40% longer lifespan.
- **50% faster** melting and processing vs. gas furnaces
- **Close to our customers** — Houston Energy Corridor location, 2–4 week lead times
- **Custom alloy optimization** for regional conditions and specific operating environments
- **In-house ISO 17025 lab** — chemical analysis on every heat, electrochemical testing on every batch
- **Never melt scrap** — only primary high-grade raw materials: Al 99.9%, Zn 99.99%, In 100%

## ONSHORE CLIENTS

### Trusted by Industry Leaders

Serving 150+ Gulf Coast refineries and chemical plants. Clients include ExxonMobil, Shell, BP, Chevron, Marathon, Williams, Corpro (Aegion), Ljungström, ARVOS Group, Global Industries, and industrial operators worldwide. Over 1,000 projects in the past five years.
