

**HEATER TREATERS AND VESSEL SOLUTIONS
SINCE 1977. MADE IN THE USA.**

INTERNAL VESSEL PROTECTION ENGINEERED FOR THE HARSHTEST CONDITIONS

Houston Anodes manufactures aluminum and zinc sacrificial anodes purpose-built for internal vessel applications. Custom-cast to exact specifications for any tank bottom or vessel interior. Zero product failures in 50 years. Our induction-cast anodes last 40% longer than gas-furnace alternatives.

RIGHT SPECS

Induction-cast alloys. Zero porosity, perfect density.

- ✓ Aluminum alloys (99.9% purity)
- ✓ Zinc alloys (99.99% purity)
- ✓ 40% longer anode lifespan
- ✓ NACE, DNV, NORSOK compliant

RIGHT WEIGHT

Structural protection from 5 lbs to 1,250 lbs standard.

- ✓ Heater treater
- ✓ Heater treater eyebolt
- ✓ Bowling ball
- ✓ Drum

RIGHT FIT

Built for vessel interiors and tank bottoms.

- ✓ Red/blue caps and nuts on request
- ✓ Squar $\frac{3}{4}$ " steel rod core standard
- ✓ Any core length to spec
- ✓ Custom geometries welcome

BUILT TO THE ENERGY'S HIGHEST STANDARDS

ISO 9001:2015

ISO 17025

ORSTED APPROVED

US NAVY APPROVED

AND MORE+

PROTECTING VESSELS FROM THE INSIDE OUT

Gas-furnace anodes leave up to 41% of their mass as passive material that never protects the vessel. Induction-cast anodes deplete completely. The difference shows up in replacement intervals and total cost of ownership.

Houston Anodes (Induction)

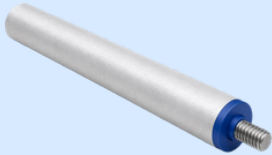

- 0% passive material
- 100% indium activation
- Zero porosity, perfect density
- Predictable depletion rate
- 40% longer service intervals

Gas-Furnace Anodes

- 41% passive material wasted
- Partial indium activation
- Porosity defects
- Unpredictable depletion
- Shorter replacement cycles
