

ONSHORE INFRASTRUCTURE SOLUTIONS
SINCE 1977. MADE IN THE USA.

BUILT FOR THE HARSHTEST ENVIRONMENTS ON EARTH

Houston Anodes has protected deepwater platforms, subsea structures, and offshore wind foundations since 1977. Zero product failures in 50 years. We design, manufacture, and deliver high-quality aluminum and zinc sacrificial anodes using electromagnetic induction technology, producing anodes that last up to 40% longer than conventional alternatives.

RIGHT SPECS

In-house ISO 17025 lab.
Every batch tested.

- ✓ Aluminum 99.9% purity
- ✓ Zinc 99.99% purity
- ✓ Never melt scrap or recycled material
- ✓ Chemical analysis on every heat

RIGHT WEIGHT

Standard and custom weights for onshore applications. From 5lbs to 1,650 lbs.

- ✓ Light-duty (5 to 99 lbs)
- ✓ Medium-duty (100 to 400 lbs)
- ✓ Heavy-duty (401 to 1,650 lbs)
- ✓ Custom configurations available

RIGHT FIT

Built for refinery, chemical, and pipeline operations.

- ✓ Pier, piling, and ballast anodes
- ✓ Heater treater and tank anodes
- ✓ Pipeline bracelets (retrofit-ready)
- ✓ Custom clamp, mat, and link

REFINERIES AND CHEMICALS

AL ZN

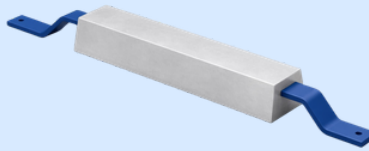

Internal vessel protection for heater treaters, tanks, drums, and process equipment. Red/blue caps available on request.

PIPELINES AND PIERS

AL ZN

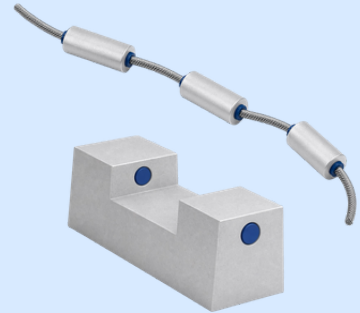

- Trapezoidal flush core, stand-off (A & B)
- Rod core / Rod stand-off
- Bolt-on available for retrofit.
- Any core length to spec

CUSTOM AND SPECIAL

AL ZN

Clamp, mat, link, and any geometry required. In-house mold manufacturing means fast turnaround on specialty projects.

Houston Anodes

- 2 to 8 week lead time
- ISO 17025 tested every batch
- 100% homogeneous alloy
- 100% made in the USA
- **Retrofit-ready product line**

Anodes Imports

- 4 to 8 months lead time
- Freight and tariff exposure
- Inconsistent chemistry
- Variable alloy quality
- **Limited retrofit support**
