

ABOUT US

For over 40 years, Houston Anodes has been one of the leading high-quality Sacrificial Aluminum and Zinc Anodes manufacturer in the world. Today, Houston Anodes protects billions of dollars' worth of equipment and infrastructure worldwide with proven experience with companies as:

Houston Anodes operates fully registered quality management system to ISO 9001 Standards for the Manufacturing of Sacrificial Anodes.

Our Sacrificial Anodes meet or exceed all national and international standards including DNV, ISO and NACE.

Our Anodes are fabricated using only raw material of the highest purity and subject to thorough quality inspections thus assuring superior electrochemical and chemical properties of our anodes.

Houston Anodes can fabricate any type, any size and any shape of anode to accommodate our customer's specific needs since we also manufacture our own molds.

Houston Anodes is equipped with an intern state-of-the-art Laboratory accredited to the ISO 17025 Standard.

OUR PRODUCTS

Houston Anodes specializes in delivering all of the most commonly used anode types with several core configurations to suit a wide range of offshore and marine applications. For standard sizes and specification please download our catalog at www.houstonanodes.com. For custom anodes, please provide us with a drawing and/or anode dimensions and desired weight as well as chemical composition specification and anode manufacturing specifications if available. Because we have the capacity to manufacture our own molds, we are able to offer competitive prices on custom anodes.

Basic anode type includes:

- Platform Anodes
- Pipeline Bracelet Anodes
- Pier, Pilings and Ballast Anodes
- Hull Anodes
- Tank and Vessel Anodes
- Custom Anodes

RIGHT WEIGHT
RIGHT FIT
RIGHT CHEMICAL COMPOSITION
RIGHT ELECTROCHEMICAL
PROPERTIES

OUR ADVANTAGES INDUCTION TECHNOLOGY

Induction Furnaces dedicated to the production of Aluminum and Zinc sacrificial anodes offer a wide range of advantages in efficiency and quality over gas furnaces.

- 100% Homogeneous Alloy
- Environmental Friendly
- Three Times Faster than gas furnaces
